

Dorian Marié

Programmer

Experience

- September 2020–
January 2022 **Full-Stack Developer**, *Doctolib*, Paris.
Doctolib is the most popular way for people in France to book appointments with doctors and for doctors to manage their appointments
- Our team integrated video-consultation into Doctolib Medecin, a new product for doctors to manage their consultations
 - Our team added the place of birth of patients to the patient interface and to the doctor interface
 - Our team created a virtual printer on the desktop application
- Built with **Ruby on Rails**, **React**, TypeScript, Electron
- November 2016–May 2017 **Backend Engineer**, *Trusted*, San Francisco.
Trusted was a baby-sitting on demand service in the Bay Area then we expanded to New York and got acquired by Care.com
- We implemented pricing with prices per hour of the week and per geographical zone, with an admin interface to manage it
 - I implemented an API to build a web interface
 - I implemented an API for unfulfilled searches of baby-sitters
- Built with **Ruby on Rails**
- September 2013–
August 2015 **Software Engineer**, *Bespoke Post*, New York.
Bespoke Post is a subscription service that sends a quality products every month
- We made the website work well on mobile phones
 - I made products more flexible allowing customisations
 - We created a separate store to sell individual products
 - I created a gift card creation page
- All built on **Ruby on Rails** with jQuery then Angular.
